

List of Capacitance Values

Addendum to Datasheets

Temex Ceramics can make any capacitance value within the capacitance range of any series. However, we cannot list all possible values, or even all existing values - the ones that we already manufactured - in our datasheets. So we decided to write this addendum for our customers who request confirmation for a given capacitance value that is not listed on our web site.

On request, we can add any other capacitance value to this list, provided it is within the range of the series. From now on, we will complete this list with each new request.

<i>Series</i>	<i>Capacitance Value (pF)</i>	<i>Voltage Rating (V)</i>	<i>Beginning of Designation</i>
SHS	11	250	251 SHS 110 (...)
CHB	5.1	500	501 CHB 5R1 (...)
CHB	9.1	500	501 CHB 9R1 (...)
CHB	51	500	501 CHB 510 (...)
CHB	75	500	501 CHB 750 (...)
CHB	160	300	301 CHB 161 (...)
CHB	200	300	301 CHB 201 (...)
SHS	1.6	250	251 SHS 1R6 (...)
SHS	2.0	250	251 SHS 2R0 (...)
SHS	6.2	250	251 SHS 6R2 (...)
